

Healthy soils with Garden Pearls Calcium

Use Garden Pearls® Calcium Carbonate to increase soil pH for disease management and create fertile soils for annuals, ornamentals, and garden vegetables such as cabbages, broccoli and all root crops, lettuce, tomatoes, many flowers.

Benefits of using Garden Pearls Calcium

- Reach your target pH fast
- Steady pH control
- Adds available calcium, an important nutrient
- Easy to incorporate into your soil
- Waters right in
- Great for your compost pile
- Approved material under WSDA organic food program
- Safe to handle, non-caustic, will not burn

Easy to handle pelletized lime. Sprinkle by hand, spread with fertilizer spreader or add to compost. Application is simple, apply at rates recommended by soil test.

Balanced Soils

Just like antacids help calm your stomach, use Garden Pearls to help balance pH and improve the health of your soil. Healthy soil is the foundation of healthy plants.

Easy to Use

Garden Pearls are simple to apply. Garden Pearls can be spread evenly by hand, with your garden fertilizer spreader, or blended with compost. You can apply Garden Pearls any time of the year.

Calcium Nutrition

Add Garden Pearls® to your soil to increase the calcium available for your plants which improves fruit and vegetable quality and helps plants tolerate heat and drought.

Compost Building

Add Garden Pearls to your compost pile. They will assist bacteria function and supply a calcium source that binds with acids that develop during the composting process and will help to prevent a loss of nutrients.

Lawn Care

Grasses thrive between pH 6 and 7. Rain, irrigation and fertilizers make soils acidic. Depending on your pH, applying lime or gypsum on your lawn will bring it close to perfection by supporting the mineral needs of your soils.

Organic

Garden Pearls are an approved material under the WSDA organic food program, non-caustic and will not burn. Garden Pearls help you balance your garden soil safely, without chemicals.
